Roadmap

- ① Introduction
- ② Methodology
- ③ Results
- ④ Conclusion

Roadmap

1 Introduction

2 Methodology

3 Results

4 Conclusion

Refresher on Market Power

- Definitions, mechanisms, canonical refs.
- Where this paper fits in the literature.

Contribution (Short Discussion)

- **What's new:** data/setting/ID/outcome.
- **Why it matters:** economic or policy relevance.
- One-slide pitch of your innovation.

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Paper's Story / Key Findings

- Narrative arc in 3–4 bullets.
- **Key quantitative takeaways** (numbers to remember).

Main Results — One-Slide Overview

- Very short preview of signs and magnitudes.
- Brief intuition for the result.

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Data: Sources & Coverage

- Hospital data (coverage, time, variables).
- Geographic data (units, merges).
- Worker data (sample definition).

Process of Use (for Each Data Type)

- Cleaning and harmonization steps.
- Linkage logic across sources.
- Key variable definitions.

Table: Summary Statistics (Illustrative)

Group	Mean	SD	N
Hospitals			
Geographies			
Workers			

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Model / Estimating Equation

$$y_{it} = \beta \text{Treat}_{it} + \gamma X_{it} + \alpha_i + \tau_t + \varepsilon_{it} \quad (1)$$

- Units, timing, FE, SEs.
- Interpretation of β and threats to ID.

Summary Statistics & Balance

Table: Summary / Balance (Illustrative)

Variable	Control	Treat	Diff
Outcome (baseline)			
Covariate A			
Covariate B			

Treatment vs. Control (Definition)

- Operational definition of **treatment** and **control**.
- Timing / exposure, staggered adoption if any.
- Sample restrictions and measurement windows.

Alternative Specifications — Preview

- Heterogeneity (hospital size, region, worker type).
- Functional form variants / additional controls.
- Event study / placebo / robustness roadmap.

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Main Results: Table

Table: Main Specification (Illustrative)

	(1)	(2)	(3)	(4)
Treat				
Controls				
FE				
N				
R^2				

:

Side-by-Side Comparisons

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Robustness / Alternative Specs

- Sensitivity to windows / bandwidths.
- Alternative outcomes / subsamples.
- Placebo and permutation checks.

Roadmap

① Introduction

② Methodology

③ Results

④ Conclusion

Conclusion

- **What we learned** — 2–3 bullets.
- **Policy/economic implications.**
- **Limitations** and next steps.

Thank You

Questions?

Roadmap

:

Data Details

- Construction and variable definitions.
- Additional balance / coverage checks.
