CONTENTS

Preface	xi
---------	----

Part 1	Introduction	1
--------	--------------	---

1	The Nature of Dynamic Optimization	3
1.1	Salient Features of Dynamic Optimization Problems	4
1.2	Variable Endpoints and Transversality Conditions	8
1.3	The Objective Functional	12
1.4	Alternative Approaches to Dynamic Optimization	17

Part 2	The Calculus of Variations	25
--------	----------------------------	----

2	The Fundamental Problem of the Calculus of Variations	27
2.1	The Euler Equation	28
2.2	Some Special Cases	37
2.3	Two Generalizations of the Euler Equation	45
2.4	Dynamic Optimization of a Monopolist	49
2.5	Trading Off Inflation and Unemployment	54
3	Transversality Conditions for Variable-Endpoint Problems	59
3.1	The General Transversality Condition	59
3.2	Specialized Transversality Conditions	63
3.3	Three Generalizations	72
3.4	The Optimal Adjustment of Labor Demand	75

4	Second-Order Conditions	79
4.1	Second-Order Conditions	79
4.2	The Concavity/Convexity Sufficient Condition	81
4.3	The Legendre Necessary Condition	91
4.4	First and Second Variations	95
5	Infinite Planning Horizon	98
5.1	Methodological Issues of Infinite Horizon	98
5.2	The Optimal Investment Path of a Firm	103
5.3	The Optimal Social Saving Behavior	111
5.4	Phase-Diagram Analysis	117
5.5	The Concavity/Convexity Sufficient Condition Again	130
6	Constrained Problems	133
6.1	Four Basic Types of Constraints	134
6.2	Some Economic Applications Reformulated	144
6.3	The Economics of Exhaustible Resources	148

Part 3 Optimal Control Theory 159

7	Optimal Control: The Maximum Principle	161
7.1	The Simplest Problem of Optimal Control	162
7.2	The Maximum Principle	167
7.3	The Rationale of the Maximum Principle	177
7.4	Alternative Terminal Conditions	181
7.5	The Calculus of Variations and Optimal Control Theory Compared	191
7.6	The Political Business Cycle	193
7.7	Energy Use and Environmental Quality	200
8	More on Optimal Control	205
8.1	An Economic Interpretation of the Maximum Principle	205
8.2	The Current-Value Hamiltonian	210
8.3	Sufficient Conditions	214
8.4	Problems with Several State and Control Variables	221
8.5	Antipollution Policy	234
9	Infinite-Horizon Problems	240
9.1	Transversality Conditions	240
9.2	Some Counterexamples Reexamined	244
9.3	The Neoclassical Theory of Optimal Growth	253
9.4	Exogenous and Endogenous Technological Progress	264
10	Optimal Control with Constraints	275
10.1	Constraints Involving Control Variables	275

10.2	The Dynamics of a Revenue-Maximizing Firm	292
10.3	State-Space Constraints	298
10.4	Economic Examples of State-Space Constraints	307
10.5	Limitations of Dynamic Optimization	313
	 Answers to Selected Exercise Problems	 315
	Index	323
